

Counter piracy and Safe room solutions

CCTV for crew intelligence
in safe room

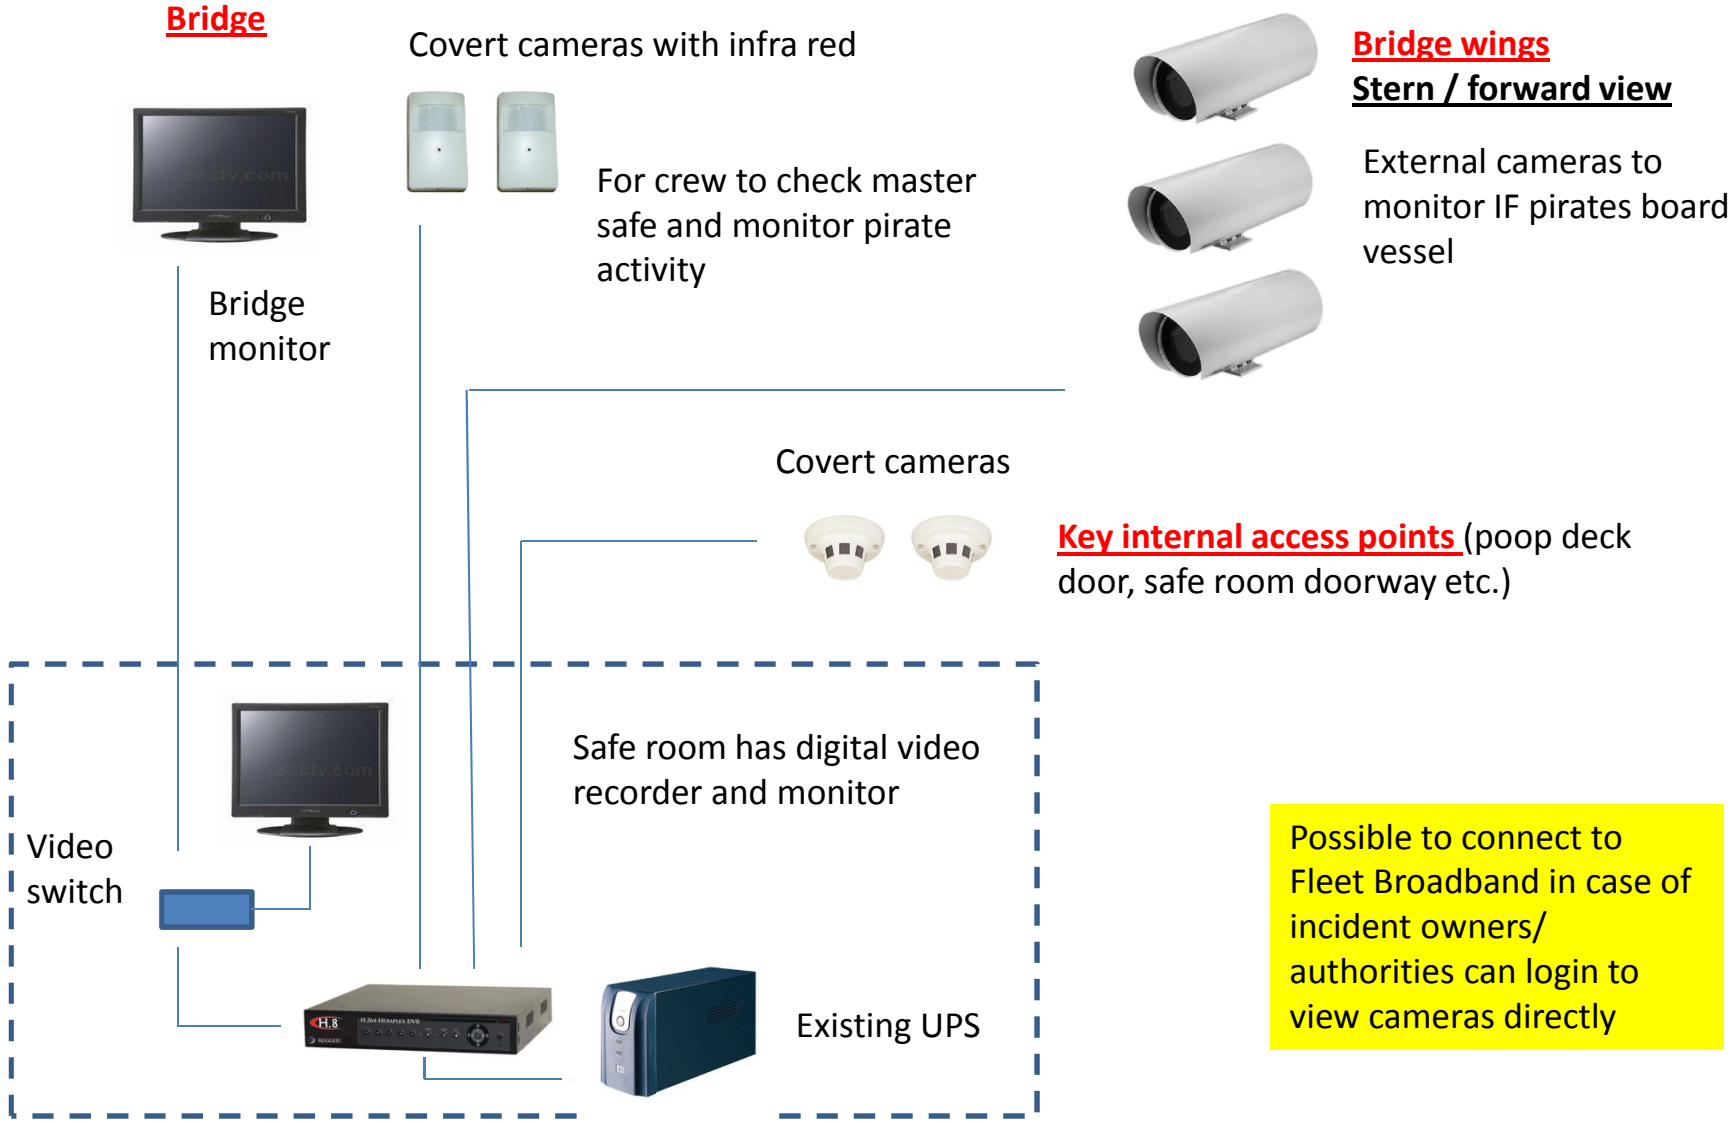

www.startpointsystems.com

Safe room solutions - CCTV

- Allows Master to know **if pirates board the vessel**, to shut engine and retreat to safe room
- Crew monitor if Master is safe as pirates board
- Allows crew to have intelligence - know how many pirates board, what weapons they have and their activities
- Crew can report situation awareness to authorities even if pirates cut power (with UPS)
- Owners/ Authorities can connect to CCTV via Fleet Broadband to see what is happening
- Record pirates for prosecution purposes

CCTV for monitoring, reporting and recording

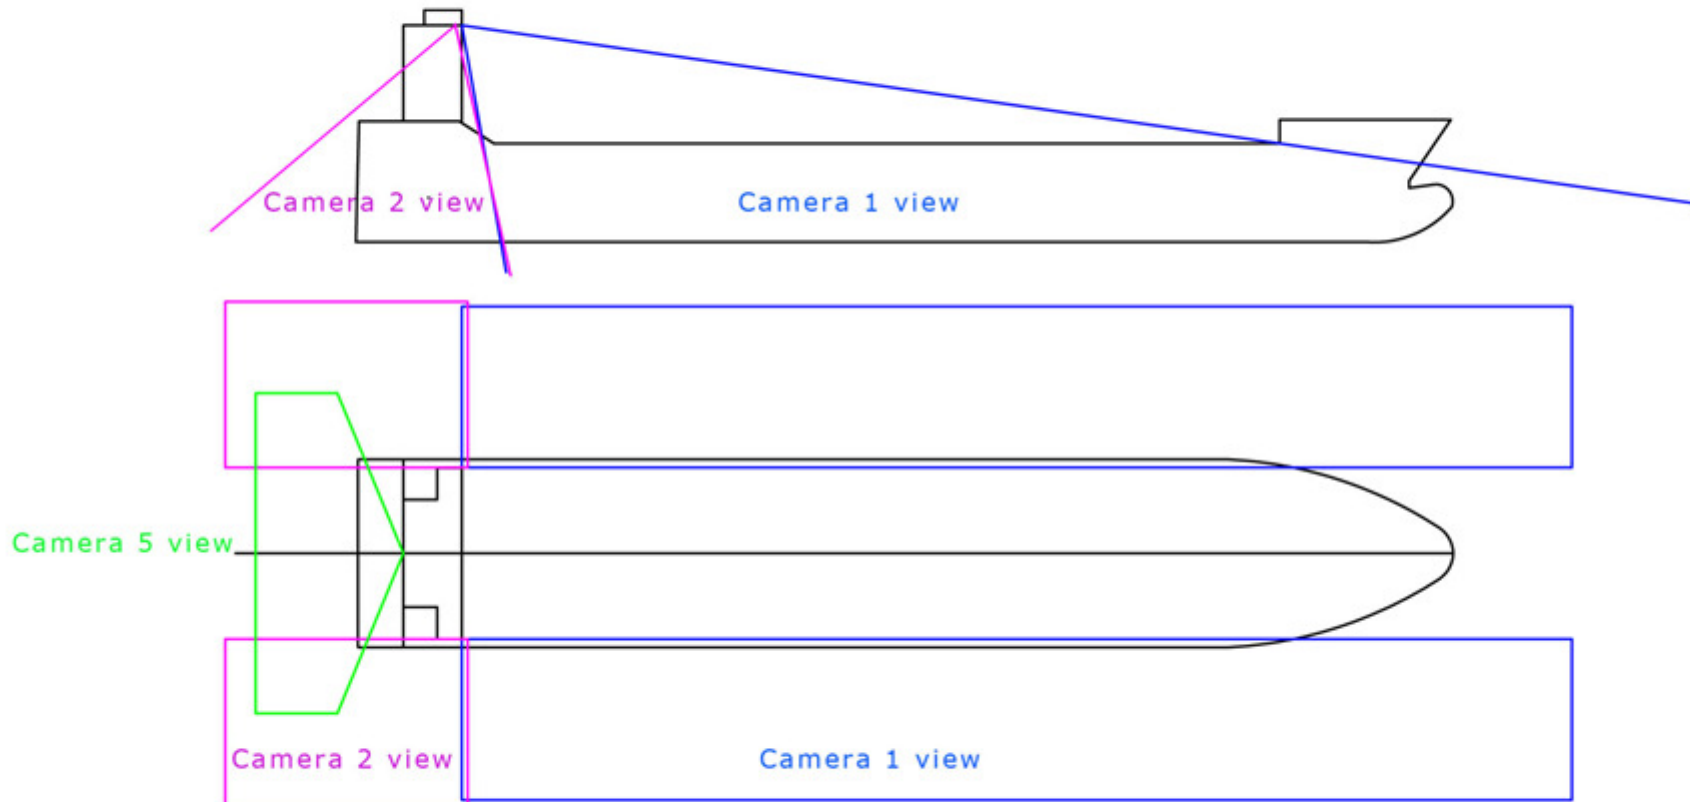

Possible to connect to Fleet Broadband in case of incident owners/ authorities can login to view cameras directly

Note: power supply protects each camera, so if any camera line cut the system will continue to work

CCTV for vessels

- External cameras x 5 covering perimeter
- Internal cameras x 4 covering bridge and key access points

Typical ship installation – external and internal cameras – up to 16 can be connected and recorded
